SpotSee®

MicroDL Temperature Data Loggers

The MicroDL temperature data logger is a coin sized device packed with an array of features allowing it to tackle the biggest of temperature monitoring tasks. With optional memory sizes of 8K, 32K and 64K, and accuracy as tight as 0.2°C, our digital display technology gives you on-the-spot verification that the internal temperatures of your packaged contents meets specifications. The MicroDL even has probed configurations enabling temperature monitoring at -80°C (dry ice) and -200°C (cryogenic) temperatures.

MicroDL

Perfect for use in cold chain applications in the life science industry where products require temperature monitoring in transit and storage. Ideal for small spaces and integration into existing packaging or shipping systems as a robust temperature validation measure.

• Multi-use, user programmable
• LCD information display options
• Cumulative and continuous alarm settings
• 21 CFR Part 11 compliant software capable
• 8K, 32K, 64K memory configurations

Display Examples

Press the Start button to see the following information display with each press:

1. Rec: 8.6°C shows recording and current temperature

2. Run: 11 D shows elapsed time in days

3. Mkt: 9.1°C shows mean kinetic temperature

4. Hi: 15.2°C shows alarm has occurred and high temperature

5. Low: 8.2°C shows alarm has occurred and low temperature

6. Hi Hr: 0.3 shows alarm time hours over high threshold

7. Low Hr: 1 shows alarm time hours over low threshold

8. Rec: 8.6°C Push to return to current temperature
